

WAIPUKURAU FACIAL ECZEMA SPORE COUNT MONITOR - 2016

Please note that the following spore counts are individual counts from selected properties and are only a rough guide as to counts in the area. Individual paddocks or geographical areas can vary hugely depending on local topography/climate and pasture type/condition. For an accurate assessment of your pastures regular spore counting is recommended during danger periods.

As a guide levels of over 30,000 spores/gram of pasture will cause toxicity if grazed for over 2 weeks while levels of over 100,000 spores/gram can cause serious liver pathology after as little as 3 days.

LOCATION	May														
	Week 1	Week 2	Week 3	Week 4	Week 1	Week 2	Week 3	Week 4	Week 1	Week 2	Week 3	Week 4	Week 1	Week 2	Week 3
Hinerangi	10000														
Patangata	0														
Ashley Clinton
